Executive Summary

Summarise the work provided by AAGI and the main results. Aim to keep this to a single page.

Introduction

- Goals of the research project.
- Background, context and rationale behind the research.

This is a subsection

Use subsections (and subsubsections) as needed to structure your content.

Experimental/Trial Design

- Trial design type and layout.
- Treatments, number of replicates, blocking.
- Notes on specific considerations (e.g. small plots, glasshouse, breeding trials, OFE, bioinformatics).

Exploratory Data Analysis and Data Visualisation

- Interpretation of data and visualisations.
- Rationale for the statistical methodologies used.

Methods

- Detailed description of the procedures and methodologies used.
- Software versions, pipeline commits, and input/output details.

Results and Discussion

Findings and their implications with respect to the research question. Include citations (Box 1976).

Figure Example

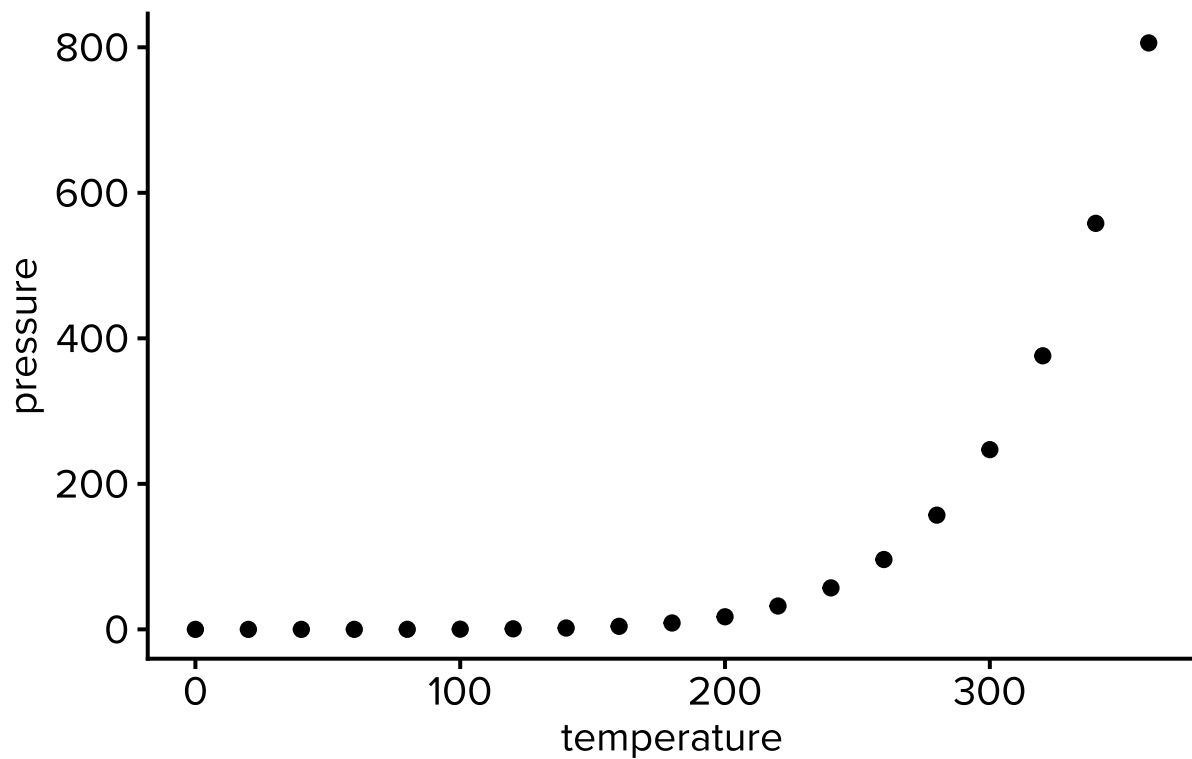

Figure 1: An example figure using `{ggplot2}` with the AAGI theme.

Table Example

Table 1: An example table using `{flextable}` with the AAGI theme.

Ozone	Solar.R	Wind	Temp	Month	Day
41	190	7.4	67	5	1
36	118	8.0	72	5	2
12	149	12.6	74	5	3
18	313	11.5	62	5	4
		14.3	56	5	5
28		14.9	66	5	6

Ozone	Solar.R	Wind	Temp	Month	Day
-------	---------	------	------	-------	-----

Datasets and Metadata (Optional)

- Links and DOIs to associated datasets (e.g., GRDC Data Catalogue entries).
- md5/sha256 checksums for input data and outputs.
- Git commit numbers and tags for associated code repositories.

Trial Location Maps (Optional)

Include if relevant to the project.
